
Executive summary

A M.Tech Embedded Systems Engineering student with a background in Electrical and Electronics Engineering with strong foundation in both Embedded C as well as core electronics with a hands on experience with ARM based microcontroller boards and rapid prototyping boards such as Arduino and Raspberry Pi. I am currently exploring various domains within embedded systems in order to find my area of specialization. As a part my commitment in ensuring continuous learning, this internship would help deepen my understanding of different domains within embedded systems and choose the right specialization to pursue advanced certification. I am looking forward in developing my skill and contribute wherever as I gain practical experience in real world projects.

Internship

SAUTER MIDDLE EAST

Aug 2023 - Sept 2023

- Had gained knowledge about Building management system, Fire fighting systems, Heating, Ventilation and Air conditioning (HVAC) systems.
- This includes FAHU and AHU systems, the operation of the HVAC systems in a event of fire, different tools and terminology used in these systems, different roles and requirement of BMS and fire handling system and their interface between the two.

Certifications

INTRODUCTION TO LINUX(LFS101)

2025-Present

The Linux Foundation

About the organization: The Linux foundation is a non profit organization with an intention to support Linux development. About the course: The course is a 60 hrs self-paced program that introduces the basics of the Linux operating system.

Skills

LANGUAGES : English, Tamil, Hindi, Malayalam**PROGRAMMING :** $\LaTeX$, Python, Embedded C, C**OPERATING SYSTEMS :** Linux, Microsoft Windows**VERSION CONTROL SYSTEMS :** Git, GitHub

Technical writing & 3D computer graphics (Github Page)

Education

M.TECH EMBEDDED SYSTEMS

2025-Present

Amrita Vishwa Vidyapeetham, Coimbatore

B.TECH ELECTRICAL AND ELECTRONICS ENGINEERING

Vellore Institution of technology, Chennai

2021-2025
